Self-taught via YouTube and
online courses
Currently improving SQL & Power
BI

Alfred Shingai

DATA ANALYST

Data Analyst skilled in building dashboards and machine learning models to solve real business problems. Experienced in turning raw data into actionable insights and decision-support tools.

PROJECT EXPERIENCE

Bank Customer Churn Prediction

Built end-to-end ML pipeline on 10,000+ records. Achieved AUC-ROC of 0.868 using Gradient Boosting. Identified key churn drivers and recommended targeted retention strategies.

Bike Sales Dashboard

Analyzed 1,000 customers using Excel dashboards. Identified high-income professionals as top segment and regional conversion differences.

Sales Performance Dashboard

Built interactive Excel dashboard. Revealed 60% revenue concentration in two regions and reduced analysis time significantly.
